

Medical Radiography Program

PROGRAM MISSION, GOALS, AND PROGRAM EFFECTIVENESS DATA

The Medical Radiography Program offers potential candidates the opportunity to complete an Associate of Applied Science degree in Medical Radiography. This program serves as a means to address the need for Registered Technologists in Radiography, R.T. (R) in Virginia, nationally and internationally to meet society's need for highly skilled and knowledgeable Radiographer professionals.

PHILOSOPHY

The Medical Radiography curriculum has been designed to thoroughly prepare students for an entry-level career as a Radiographer. The program teaches the physical and applied science of Radiography, with a focus on the application of theory to clinical practice. This program is designed to provide students with a fundamental imaging foundation so that they are competent clinical practitioners capable of producing diagnostic radiographs while subjecting the patient and healthcare personnel to minimum radiation exposure. Students learn critical thinking skills and independent professional judgment, thus preparing graduates for success on the national and/or any applicable state exams and in the workplace.

PROGRAM PURPOSE

The Medical Radiography Program at ECPI University, School of Health Science, Medical Careers Institute prepares graduates to provide professional patient care and assessment, competent performance of radiologic imaging and total quality management and safety, in the application of ionizing radiation to humans.

The program's main purpose is to educate students with the most current knowledge and skills to meet the needs of the client and the demands of the healthcare industry. This program includes emphasis on the culture of safety, education, and interdisciplinary collaborative learning from both community-based and hospital settings.

Upon completion of the program, students receive an Associate of Applied Science degree in Medical Radiography, which allows them to become eligible to sit for the national ARRT exam in Radiography and also qualifies graduates for state licensing. As a Radiographer, a vast range of opportunities are available to the graduate, allowing continued professional growth and educational development.

PROGRAM GOALS & LEARNING OUTCOMES INCLUDE:

Upon completion of the program:

Students will be clinically competent.

- Students will demonstrate accurate positioning skills.
- Students will provide proper radiation protection.

Students will demonstrate effective communication skills.

- Students will provide effective oral communication skills.
- Students will demonstrate effective written communication skills.

Students will demonstrate critical thinking.

- Students will manipulate technical factors.
- Students will modify procedures to meet patient needs.

Students will model professionalism.

- Students will demonstrate ethical behavior.
- Students actively participate in learning experiences during clinical training.

ACCREDITATION

The Medical Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology at the following ECPI campuses: Newport News and Northern Virginia, Virginia. This is a programmatic accreditation by JRCERT, which is the only agency recognized by the US Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA), for the accreditation of traditional and distance delivery educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry.

For more information, visit <http://jrcert.org/>.

Joint Review Committee on Education in Radiologic Technology

20 N. Wacker Drive, Suite 2850

Chicago, IL 60606-3182

Telephone 312.704.5300, fax 312.704.5304, email: mail@jrcert.org

Graduates qualify to sit for the national exam of the American Registry of Radiologic Technologists (ARRT).

PROGRAM EFFECTIVENESS DATA

Program effectiveness data includes the program completion rate, credentialing examination pass rate and job placement rate. Explanations of these measures and program data that correspond with the annual report most recently submitted to the JRCERT are noted below. This information can also be obtained at www.jrcert.org/resources/program-effectiveness-data.

The Newport News and Northern Virginia campuses radiography program's most recent annual reports to the JRCERT reflected the following:

Completion Rate - January 1 through December 31, 2018

This is an annual measurement of the number of students that began the program divided by the number of students that actually completed the program.

NEWPORT NEWS:

The program's completion rate for 2018 was 83%. 15 of the 18 students expected to complete the program in 2018 went on to complete it in that year.

NORTHERN VIRGINIA:

The program's completion rate for 2018 was 88%. 14 of the 16 students expected to complete the program in 2018 went on to complete it in that year.

Credentialing Examination Pass Rate - 2014 through 2018

This is the number of students that pass the American Registry of Radiologic Technologists (ARRT) certification examination on the first attempt within six months of graduation from the program.

NEWPORT NEWS:

The program's credentialing examination pass rate stated as an average from the years 2014 through 2018 is 85%. 99 of the 117 graduates taking the ARRT certification examination in this timeframe passed the exam.

NORTHERN VIRGINIA:

The program's credentialing examination pass rate stated as an average from the years 2014 through 2018 is 91%. 72 of the 79 graduates taking the ARRT certification examination in this timeframe passed the exam.

Job Placement Rate - 2014 through 2018

This is the number of students that gain employment in the radiologic sciences within twelve months of graduation versus the number that graduate and are actively seeking employment. The figure reflects an average over a five-year span.

The JRCERT has defined “not actively seeking employment” as:

- 1) Graduate fails to communicate with program officials regarding employment status after multiple attempts OR
- 2) Graduate is unwilling to seek employment that requires relocation OR
- 3) Graduate is unwilling to accept employment due to salary or hours OR
- 4) Graduate is on active military duty AND/OR
- 5) Graduate is continuing education.

NEWPORT NEWS:

The program's job placement rate as an average from the years 2014 through 2018 is 82%. 98 of the 119 graduates actively seeking employment obtained employment in the radiologic sciences.

NORTHERN VIRGINIA:

The program's job placement rate as an average from the years 2014 through 2018 is 96%. 68 of the 71 graduates actively seeking employment obtained employment in the radiologic sciences
