

# MEDICAL RADIOGRAPHY

Simply put, Radiologic Technologists are in demand. According to the U.S. Department of Labor, employment of radiologic technologists is expected to grow by 21 percent from 2012 to 2022, faster than the average for all occupations. As the population grows and ages, demand for diagnostic imaging is projected to increase. Plus, healthcare providers will need to replace existing technologists as they retire.\*

As a Radiologic Technologist, you can play an important role on the patient care team. If you're ready to join this growing career field, consider earning an Associate of Applied Science Degree in Health Science - Medical Radiography. At ECPI University's College of Health Science, Medical Careers Institute, you can complete your degree in as little as 18 months through our year-round program.

## Outcomes

Upon completion of the program:

### Students will be clinically competent.

- Students will demonstrate accurate positioning skills.
- Students will provide proper radiation protection.
- Students will demonstrate effective communication skills.

### Students will provide effective oral communication skills.

- Students will demonstrate effective written communication skills.
- Students will demonstrate critical thinking.

### Students will manipulate technical factors.

- Students will modify procedures to meet patient needs.

### Students will model professionalism.

- Students will demonstrate ethical behavior.
- Students actively participate in learning experiences during clinical training.

## Possible Career Track

- Hospitals
- Medical Imaging Centers
- Mobile Imaging
- Outpatient Care Centers & Primary Care Clinics
- Medical Research
- Education & Industry
- Radiology Sales & Service
